

Planets - 2

1. Daniel and his friends want to travel to space, so they check some companies' tickets.

According to the given tickets, which of the following is NOT correct?

- MoonX and PoloX are cheaper than Buzz17.
- They can travel faster by MoonX.
- They can carry more things by Buzz17.
- PoloX is slower than MoonX.

Answer questions 2 -3 according to the table.

	Jupiter	Saturn	Uranus
Size	139,822 km	116,464 km	50,724 km
Distance from the Sun	778,340,821 km	1,426,666,422 km	2,870,658,186 km

2. Which of the following is CORRECT according to the given table?

- Jupiter is smaller than Saturn.
- Saturn is the closest planet to the Sun.
- Uranus is farther from the Sun than Saturn.
- Jupiter is the smallest of all planets.

3. Which of the following questions has NO answer?

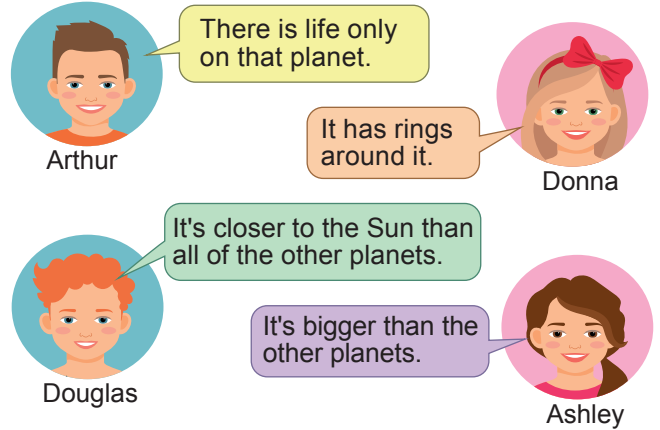

- Which of them is the largest planet?
- What is the distance from Jupiter to the Sun?
- How far is Saturn from the Sun?
- What is the size of the Sun?

- 4.
- The Earth is between Venus and Mars.
 - The Mercury takes place before Venus.
 - Jupiter comes after Mars.
 - Neptune comes after all the planets.
 - Saturn is closer to the Earth than Uranus.

According to the given information, which of the following is the CORRECT order of the planets above?

- Earth - Mercury - Venus - Mars - Jupiter - Uranus - Neptune - Saturn
- Mercury - Uranus - Venus - Earth - Mars - Jupiter - Saturn - Neptune
- Mercury - Venus - Earth - Mars - Jupiter - Saturn - Uranus - Neptune
- Saturn - Mercury - Venus - Neptune - Mars - Jupiter - Uranus - Earth

5. Arthur and his friends give information about some planets.

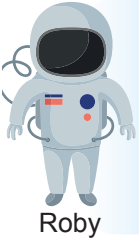

Who gives information about the size of a planet?

- Arthur
- Donna
- Douglas
- Ashley

Planets - 2

6.

There are eight planets in our solar system. All of them are different from each other. For example, Saturn has rings around it. Mercury is the smallest one and closest to the Sun. Mars is a stormy planet, and it is known as red planet. Venus doesn't have any moons.

According to the text, which of the following is NOT correct?

- A) Saturn has a different shape from other planets.
- B) There are strong winds on Mars.
- C) All of the other planets are bigger than Mercury.
- D) Venus has more than one moon.

7. Mercury is the first planet from the Sun, and there is no possibility of life on it. Neptune is the last planet in the solar system, and it is the gas giant. Uranus has a pale blue colour because it has ice crystals. It is the ice giant. Earth has an intelligent life form on it. People call it 'Blue Planet'. Venus is the second planet from the Sun. It is closer to the Earth than other planets. Jupiter is larger and bigger than any other planet in the solar system. Mars has a red surface. It is the fourth planet from the Sun. Saturn is a unique planet because it has giant rings around it. The star of the Solar system is the Sun, and it is in the centre.

In the given text, there is NO information about the - - - -.

- A) colour of the Uranus
- B) names of the planets
- C) structure of Venus
- D) first planet from the Sun

8. **Thomas:** I want to ask you some questions about space.

George : Of course.

Thomas : - - - - ?

George : Yuri Gagarin.

Thomas : That is true. - - - - ?

George : I think in 1930, but I'm not sure.

Thomas : You are doing well. Your last question is coming. - - - - ?

George : That is so easy. Sputnik 1.

Which of the following does NOT Thomas ask George?

- A) Who went into space for the first time
- B) What was the name of the first spaceship
- C) When did the scientists discover Pluto
- D) What do you know about dwarf planets?

9. • Mars is the fourth planet from the Sun.
• It has two moons.
• It is known as 'Red Planet' because it has iron minerals.

According to the given statements, which of the following does NOT have an answer?

- A) Why is Mars known as 'Red Planet'?
- B) How many moons does Mars have?
- C) What is Mars' rank in the solar system?
- D) Can people live on Mars?

10. Mars is called 'Red Planet' because the iron on its surface makes it red. Pluto is a dwarf planet in the solar system. The Earth is different from the other planets because there is life on the Earth. Mercury, Venus, Earth, and Mars have rocky surfaces.

The text gives information about the - - - -.

- A) largest planet in the solar system
- B) closest planet to the Sun
- C) rocky planets in the solar system
- D) hottest planet in the solar system
